

## **Effective pedagogical methods and innovative technological tools**

This workshop is focused on effective pedagogical methods and innovative technological tools educators can use to enhance their classroom teaching. In this interactive session, participants will use content from IBDP courses and the UN sustainable development goals as we explore effective and inspirational methods of designing lessons which truly engage learners in playing their part on the local and global level. Participants will leave this session with new ideas for incorporating meaningful, actionable ideas into future sessions with their students. Classroom teachers, pedagogical leaders, coordinators, and more are sure to find this session innovative, and will leave ready to take meaningful action in their schools and classrooms.

John Patton is the IBDP Coordinator and University Guidance Counselor at St. Gilgen International School. He loves the power of education and is driven by helping students discover in themselves their purpose and the positive impact they can have in the world, both locally and globally. As a pedagogical leader, John leads workshops focused on effective teaching and learning for the development of student passions. His current research critically evaluates the ways educational institutions support the development of student purpose through reliable pedagogical techniques
